New Hi Performance Spindle Upgrade for SVG 86 & 88 Coaters

Compact, Reduced Power Design Eliminates Driver Obsolescence

SVG 86 and 88 users should be aware that associated OEM hi performance spindle drivers are now obsolete. As the product line owner, Rite Track's 8X enhancement team has developed a solution that is not only a replacement, but also a vast improvement over the original OEM design. Rite Track now offers a completely new, redesigned hi performance spindle upgrade solutions that incorporates today's technology in a smaller footprint with reduced power consumption.

For those with existing hi performance "SMC" coat modules, now is the time to upgrade to a fully supported version to ensure your system's operational sustainability, needed in today's demanding production environment. For those with standard DC coat motors, upgrade now to our hi performance controller package with a long-life brushless servo motor for improved coat uniformity and thickness repeatability. Order your replacement kits now and rest assured that you have a sustainable solution in production.
