## Obsolete Mark Controller Notice - Replacement Available!

### NEW Controller Replaces X/F/Ke/Ka Versions - ELIMINATES Floppy Drive

Mark V/Vz & Mark 7/8 users should be aware that the original main system controller is obsolete and in very limited supply. To address this critical issue, Rite Track now offers a new, upgraded controller that ELIMINATES the floppy drive! Extend the longevity of your fab's Mark Track investment with our new controller upgrade kit exclusively from Rite Track.

Our proven OEM controller replacement adds USB capability while using your existing software to maintain system performance, recipes, wafer flows, settings, and alarm log data. Developed by Rite Track, these kits are now available at a reduced price for a limited time.

Order your replacement kits now and rest assured that you have a sustainable solution in production. Rite Track Controller Replacement Kits include:

- NEW Controller with USB, Windows Operating System
- USB Keyboard
- LCD Display Upgrade (Systems with Obsolete Plasma Screen)

**Avoid Delays, Downtime**

**\*Limited Time Offer  
expires 8/31/15**

Features	Benefits
Windows Embedded Standard 7 Operating System	Supported Windows Platform vs. Previously used J-DOS
USB Drive Replaces Floppy Drive	Eliminates Risk of Missing or Corrupted Floppy Disks
Uses Existing System Software	No Software Change = No Risk
Uses Existing SECS / GEM Boards	Fully functional - No Communication Change

Rite Track continues to fill the OEM engineering support void for Mark users. Our product upgrades, enhancements, and obsolescence solutions extend Mark series equipment life & usefulness for years to come. See our full line of Mark Upgrades. ([click here](#)).
