## Save Your Budget: Repair Non-Working ACT RDS/RGEN Pumps

### Rebuild to "Like New" Condition with New Diaphragm - 1 Year Warranty!

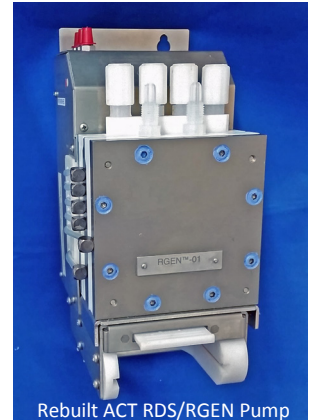

ACT users with RDS/RGEN pumps know these precise units have a fixed life. Instead of replacing them with costly upgrades that will take your tool down to implement, consider rebuilding your existing surplus pumps for quick replacement.

Rite Track offers quick-turn, fixed-price rebuild services, specifically for RDS/RGEN pumps. Unlike other providers, **we replace the diaphragm**, a leading cause of failure. We also provide new o-rings, new hydraulic media and new diaphragm plate in addition to the new diaphragm. The unit is fully tested and calibrated as a final step in our process. You receive a "like-new" RDS/RGEN pump with a (1) year limited warranty for quick use at a fraction of new replacement cost.

- Save your parts budget by recycling your existing non-functional pumps through our certified rebuild program
- Improve your uptime and MTTR with rebuilt pumps on your shelf for quick, form-fit-function replacement as needed.
- Core-Exchange option available for quick delivery (while quantities last)
- A Limited supply of rebuilt units are available without a core exchange

Contact your regional Rite Track office or sales representative for more information. Contact us to discuss your requirements. To see our full line of repair services, [click here](#) for more savings.
